Plant Biotechnology and Agrosciences

Ploidy Analysis and Genome Size in Plant Ploidy Analyser

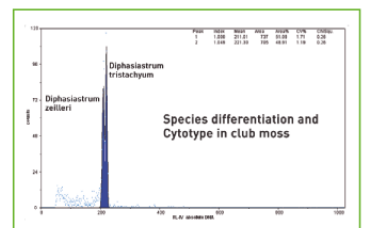

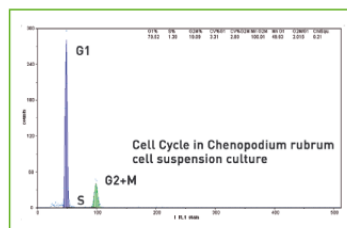

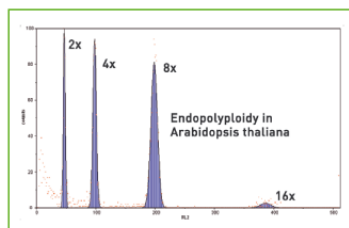

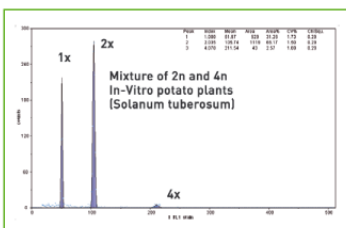

CyFlow[®] SL

Both feature:

- Screening for Haplo-, Diplo-, Triplo- and Polyploids
- Detection of Anisoploids, Allopolyploids and Aneuploids
- Detection of Apomixis and Reproduction Behaviour
- Plant Genome Size and C-Value Determination
- Cytotype Identification in Natural Populations
- Hybrid Detection
- Polysomaty and Chimeric Plants Analysis
- Sex Detection — Nuclear Base Composition
- Easy sample preparation by ready-to-use protocols
- Propidium iodide or DAPI based DNA fluorescence
- All tests on leaf, root or kallus material
- Perfect for screening of In-Vitro plant material
- Early stage tests on seeds and seedlings
