1 **I. INTRODUCTION**

2 Cytek's Opposition ("Opp.") confirms that its FACC¹ does not cure the pleading deficiencies
 3 that led the Court to dismiss Cytek's first failed attempt to state a claim for injunctive relief under
 4 the UCL. Cytek's vague "information and belief" averments that at some unspecified point in time
 5 two additional potential Cytek customers allegedly feared losing access to unspecified BD reagents
 6 based on unspecified BD conduct exposes an easily toppled house of cards: Cytek again fails to
 7 allege either a UCL claim based on threatened tying or any entitlement to injunctive relief. Cytek's
 8 unchanged UCL claim based on the assignment provisions in BD's employment agreements likewise
 9 fails. The Court should dismiss the FACC with prejudice.

10 ***No basis for UCL injunction on Cytek's "tying" claim.*** After the Court rejected Cytek's
 11 allegations of a "tying policy" based on an alleged threat isolated to one customer made long ago
 12 (*see* Order at 7–8), Cytek amended its counterclaim to add vague allegations regarding two additional
 13 potential customers who are claimed at some unspecified time to have feared losing access to
 14 unspecified BD reagents. As BD's opening brief demonstrated, Cytek still fails to "answer the basic
 15 questions: who, did what, to whom (or with whom), where, and when?" *United Bhd. of Carpenters*
 16 *& Joiners of Am. v. Bldg. & Constr. Trades Dep't, AFL-CIO*, 770 F.3d 834, 842 (9th Cir. 2014)
 17 (citation and quotation omitted). Cytek's Opposition confirms that its FACC omits the most
 18 rudimentary facts, including ***when*** these alleged events occurred; ***what***, if anything, BD actually
 19 communicated to the customers (and through whom); ***which*** reagents the customers use; and ***whether***
 20 the potential customers still have any interest in purchasing a Cytek cytometer, and if not, why.
 21 Crucially, although Cytek's tying theory has been reduced to a claim that BD allegedly threatened
 22 to withhold ***UV reagents*** from these customers, ***the FACC does not allege that any of the "potential***
 23 ***customers" even use UV reagents.*** In short, Cytek fails by a wide margin to allege that any tying
 24 "threat" was ever made, much less that there are any threats that persist today, or "likely" will "result"
 25 in lost Cytek sales, as this Court required. *See* Order at 7. Indeed, Cytek's position is undermined

26
 27 ¹ All abbreviations not otherwise defined have the same meaning as in BD's Motion to Dismiss
 28 Count I of Cytek's First Amended Counterclaims, ECF No. 116 ("MTD").

1 by the FACC’s own allegation that Cytek’s rate of converting demonstrations to sales decreased not
 2 due to supposed tying threats (*see* Opp. at 13–14), but allegedly as a result of lawful statements BD
 3 purportedly made to customers, which Cytek no longer challenges. *See* FACC ¶ 41.

4 ***No basis for UCL “unfair” tying claim.*** Cytek’s Opposition similarly cannot rescue its
 5 infirm UCL claim on the merits. Cytek abandons the position it took in opposing BD’s prior motion
 6 to dismiss, and suggests that it no longer needs to allege facts showing any likelihood that the
 7 elements of the alleged tie will come into existence. Opp. at 9–10; *compare* ECF No. 103 at 16 n.12.
 8 Cytek’s apparent contention that it need not show any likelihood of BD’s conduct ripening into an
 9 actual illegal tie to make out a UCL incipient tying claim founders on both this Court’s previous
 10 Order and well-settled precedent. Cytek’s Opposition equally fails to defend the FACC’s failure to
 11 allege the elements this Court recognized Cytek must plead.

12 *First*, Cytek’s vague allegations regarding two new potential customers fail sufficiently to
 13 plead that any tying threat—which, as explained, Cytek does not adequately allege—“was ***likely*** to
 14 result in the loss of a sale by Cytek,” such that any BD conduct likely threatened any substantial
 15 foreclosure of interstate commerce. Order at 7. Cytek’s focus on allegations of interest by these two
 16 customers in evaluating the Aurora at some point in time fails to allege the likely loss of a sale from
 17 a tying threat—the “***such that***”—that this Court previously found lacking. *Id.*

18 *Second*, Cytek’s failure to allege that the newly identified “potential customers” actually
 19 owned UV-enabled cytometers dooms Cytek’s ability to allege the essential element of coercion: if
 20 the two new customers Cytek identifies did not own UV-enabled cytometers, BD’s alleged power in
 21 the gerrymandered “UV reagent” market is irrelevant and cannot sustain a tying theory.

22 *Third*, Cytek fails to plead market power. Contrary to what the Opposition suggests, the
 23 FACC fails to plausibly allege a relevant product market restricted to UV reagents because it fails to
 24 aver facts permitting definition of the market ***after*** a BD customer has made the decision to build
 25 panels around UV reagents (thereby supposedly “locking” the customer into UV reagents), rather
 26 than ***before*** that decision is made, where Cytek admits alternatives to UV cytometers exist. And
 27 even if Cytek could narrowly define the product market as consisting only of UV reagents, Cytek’s
 28

allegations of market power still fall short. Cytek’s allegations rest on “information and belief” pleading and other factors that, on their own, do not plausibly allege market power. For example, Cytek’s reliance on BD’s patent rights is circular, because allegations that BD’s patent rights cover BD’s UV reagents do not aver that such rights preclude other entry paths.

No basis for UCL injunction on assignment provisions. As to the assignment provisions, Cytek now claims that the existence of those provisions and BD’s breach of contract claim against the Individual Defendants have created “uncertainty” for its business. Opp. at 20. But this attempt to recast its unchanged allegations falls short: Cytek cannot allege any non-speculative, imminent harm to itself, and lacks standing to bring a claim on behalf of third parties.

“[A] district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.” *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544, 558 (2007) (citation and quotation omitted). Contrary to Cytek’s position (*see* Opp. at 15), Cytek’s allegations do not raise “a reasonable expectation that discovery will reveal evidence” of the acts alleged in its FACC. *Twombly*, 550 U.S. at 556. Instead, Cytek’s vague and conclusory allegations regarding BD’s purported “tying conduct” and business “uncertainty” “stop[] short of the line between possibility and plausibility” and should be dismissed with prejudice. *Id.* at 546.

II. ARGUMENT

A. Cytek’s Tying Allegations Fail to Plead Any Basis for a UCL Injunction

The Court rejected Cytek’s earlier attempt to plead a UCL claim for a straightforward reason: Cytek failed to allege any ongoing or imminent harm, and instead rested its case on a supposed tying threat to a single customer that took place in 2017, well over a year before it asserted its counterclaim. Order at 11–12. Cytek relegates the need to allege an entitlement to injunctive relief to the end of its Opposition, and with good reason. As BD’s opening brief demonstrated, the FACC still does not allege any facts to support Cytek’s argument that there is tying conduct that is likely to recur, or that there is any continuing harm flowing from BD’s past alleged conduct. *See* MTD at 11–13.

Downplaying the prior allegation about the 2017 incident (which this Court deemed insufficient and remains unaltered, *see* FACC ¶ 18), Cytek instead argues that the FACC now alleges

1 “multiple instances of the same threatening conduct.” Opp. at 18. This assertion falls flat upon any
 2 examination of what Cytek has actually pled. Cytek’s amended allegations (FACC ¶ 19) address
 3 two “potential customers” who are vaguely alleged to have recounted fearing at an unspecified time
 4 that they would lose access to some unspecified reagents sold by BD, and who did not purchase a
 5 Cytek cytometer despite at one point exploring that possibility. The FACC again fails to allege *when*
 6 any of these events supposedly occurred. Without any facts pled as to timing, there is no basis for
 7 Cytek’s requested “inference” that BD’s alleged conduct is continuing. Opp. at 18. What Cytek
 8 seeks is not an inference, but for this Court to impermissibly “assume facts not alleged.” *Windy City*
 9 *Innovations, LLC v. Microsoft Corp.*, 193 F. Supp. 3d 1109, 1113 (N.D. Cal. 2016).²

10 Beyond its failure to plead any facts going to timing, Cytek does not allege any facts that
 11 would suggest these two customers were ever subject to any tying threat, much less any threat that
 12 continues today or poses any ongoing or threatened harm. Cytek’s averments as to these two
 13 customers are even more attenuated than the 2017 allegation this Court already rejected. Cytek does
 14 not allege any facts concerning any communication that BD ever had with either customer, including
 15 any facts that would suggest that BD ever presented the tying arrangement alleged in the FACC to
 16 the customers. ***Indeed, the FACC does not allege that these two customers used the UV reagents***
 17 ***that Cytek claims were the subject of BD’s threatened tie, or that the customers even owned UV-***
 18 ***functional cytometers.*** The FACC is likewise silent on whether these two customers still have any
 19 interest in purchasing an Aurora absent BD’s alleged conduct.³ In short, Cytek has not alleged that
 20 BD’s supposed tying threats—even if sufficiently alleged, which they are not—are “likely to result
 21 in the loss of a sale by Cytek” (Order at 7), let alone that any such purported losses are ongoing. As
 22

23 _____
 24 ² Cytek’s reliance on *Stickrath v. Globalstar, Inc.*, No. C07-1941 TEH, 2008 WL 344209 (N.D. Cal.
 25 Feb. 6, 2008) (cited in Opp. at 18-19), is misplaced. There, the question of potential injunctive relief
 26 did not depend on any inference that the defendant’s alleged conduct was “ongoing”; rather, it hinged
 on whether members of a putative class had adequately alleged that they would in fact be injured by
 such conduct. *See id.* at *4.

27 ³ It is not the case, as the Opposition suggests, that “Cytek’s potential customers are still declining
 28 to purchase Cytek’s product” because of any threatened tie. Opp. at 2. The FACC does not plead
 any facts that would support this assertion.

1 BD has demonstrated, injunctive relief requires plausible allegations of ongoing injury *flowing from*
 2 the alleged conduct. *See* MTD at 12–13 (citing *In re Napster Inc. Copyright Litig.*, 354 F. Supp. 2d
 3 1113, 1127 (N.D. Cal. 2005)). Those allegations—the “such that” this Court required (Order at 7)—
 4 are absent here.

5 As a last resort, Cytek suggests that the FACC alleges a “pattern” of past misconduct that
 6 supposedly is suggestive of ongoing harm. *See* Opp. at 18–19. “But in law as in mathematics[,] zero
 7 plus zero equals zero.” *Henderson v. Kennedy*, 253 F.3d 12, 19 (D.C. Cir. 2001). It makes no
 8 difference whether this Court evaluates the three customer allegations in the FACC (one of which
 9 this Court already rejected) individually or together. As just demonstrated, Cytek fails to plead any
 10 facts that would suggest there is any prospect of harm connected to any threatened BD tie. Cytek’s
 11 position, moreover, is undercut by its other allegations. In inviting the Court to look past the gaps in
 12 its pleading, Cytek points to a supposed decrease in the “rate at which Cytek converts a
 13 demonstration of its Aurora product to a sale.” Opp. at 13; FACC ¶ 41. The FACC, however,
 14 attributes this alleged decrease not to any threatened tying arrangement, but to BD’s supposed
 15 statements to customers—protected speech that Cytek no longer even challenges.⁴ *See* FACC ¶ 41.
 16 Cytek further undermines its own argument in the very same paragraph, as it admits that the
 17 conversion “rate” has “slightly recovered.” *Id.* The FACC’s own allegations cannot be reconciled
 18 with Cytek’s theory that BD supposedly continues to make threats or cause additional harm.

19 In short, this is not a case where an injunction is proper because “past misconduct” continues
 20 to cause harm. The FACC nowhere avers the facts necessary to support that premise. Cytek’s tying
 21 allegations should be dismissed, this time with prejudice, for failure to plead an entitlement to
 22 injunctive relief. *See In re Napster*, 354 F. Supp. 2d at 1127.

23
 24 _____
 25 ⁴ The FACC abandoned any UCL claim based on allegations that BD “spread misinformation” about
 26 Cytek or its products, although Cytek still includes the same allegations as before concerning
 27 allegedly false statements. *See* FACC ¶¶ 36-39, 41. As BD detailed in its earlier motion to dismiss,
 28 such speech (if it ever occurred) would be protected by the *Noerr-Pennington* doctrine and/or
 California’s litigation privilege, and would not be anticompetitive as a matter of law. *See* ECF No.
 88 at 18–21; ECF No. 105 at 12–14.

B. Cytek Has Failed to State a Claim Under the UCL’s “Unfair” Prong

Cytek’s Opposition confirms that its tying-based UCL claim remains infirm. As an initial matter, Cytek misstates the substantive legal test for an incipient *per se* tying violation, the theory Cytek concedes its counterclaim purports to advance (Opp. at 14 n.8). When seeking to defeat BD’s prior motion, Cytek conceded that it must allege a threatened *per se* tying violation. *See* ECF No. 103 at 1, 11–13 (asserting that Cytek must allege a “substantial threat” of establishing “each of the elements” of a *per se* tying violation). In defending against the present motion, Cytek now disclaims any burden to show a tying violation is likely. *See* Opp. at 9–10. This Court already rejected Cytek’s current position, holding that Cytek failed to supply allegations that the supposed tying arrangement was “*likely* to result in the loss of a sale by Cytek.” Order at 7 (emphasis added). Moreover, the remainder of Cytek’s Opposition—by acknowledging that it must allege threatened foreclosure and other elements—effectively concedes that it must demonstrate a likely tying violation.

Requiring Cytek, as it originally conceded it must, to demonstrate a likely completed tying violation also comports with FTC Act Section 5, which the UCL “parallel[s].” *Cel-Tech Commc’ns, Inc. v. Los Angeles Cellular Tel. Co.*, 20 Cal. 4th 163, 166 (1999). The FTC cannot apply Section 5’s incipency standard, the Ninth Circuit held, to end-run “well forged” antitrust liability standards. *Boise Cascade Corp. v. FTC*, 637 F.2d 573, 582 (9th Cir. 1980). To hold that the incipency standard is satisfied without a likely tying violation would result in precisely that impermissible outcome.⁵ Tellingly, Cytek offers no authority for its apparent position that the UCL would require a lesser showing than what is required for an action seeking to enjoin threatened tying. *See, e.g., Zenith Radio Corp. v. Hazeltine Research, Inc.*, 395 U.S. 100, 130 (1969) (requiring “significant threat of injury” from impending or likely-to-recur violation for Clayton Act injunction) (cited in Cytek’s first

⁵ *FTC v. Brown Shoe Co.*, 384 U.S. 316, 322 (1966), and *FTC v. Texaco, Inc.*, 393 U.S. 223, 224–31 (1968), contrary to Cytek’s claim (Opp. at 9 n.2), fail to support its position. *Texaco* concerned an acknowledged tying practice that actually foreclosed the requisite volume of commerce. *See* 393 U.S. at 229–30. Neither is true here. *Brown Shoe* involved not tying, but payments for exclusivity; and, in sharp contrast to this case, the extent of the practice was admitted and the examiner had found the practice had “effectively foreclosed Brown’s competitors.” 384 U.S. at 319–20. The FTC in neither case condemned the mere possibility of a foreclosing tie, which is all Cytek asserts here.

1 Opposition, ECF No. 103 at 16 n.12).⁶ Accordingly, Cytek must allege that a future tying violation
2 is likely. It has not.

3 1. Cytek Fails to Allege Likely Foreclosure

4 Cytek's assertion (Opp. at 12) that its two new customer allegations sufficiently allege
5 threatened foreclosure of "substantial sales in the cytometer market" (FACC ¶¶ 19, 48) fails.
6 Paragraph 19 of the FACC fails to cure the deficiency this Court previously identified. As before,
7 "Cytek does not plead any facts showing the customer to whom the tying arrangement was presented
8 had any interest in purchasing a cytometer from Cytek, *such that* the arrangement was likely to result
9 in the loss of a sale by Cytek." Order at 7 (emphasis added).

10 Cytek points to allegations of "interest" but entirely ignores the second part of this critical
11 sentence in this Court's Order. As addressed in BD's opening brief (MTD at 21–22), Cytek's two
12 new "potential customer" allegations do not plead that either customer was likely to have purchased
13 a Cytek cytometer absent BD's alleged conduct. Cytek buries its response to this point in a footnote,
14 arguing without any citation to the FACC that "it is reasonable for the Court to infer such intent
15 based on Cytek's other allegations." Opp. at 12 n.7. Cytek again asks the Court to "infer" facts that
16 are nowhere alleged, *i.e.*, that these customers possessed sufficient interest in Cytek's cytometers
17 "*such that*" it is likely they would have purchased from Cytek absent the (insufficiently alleged)
18 supposed BD tying threat. Order at 7.

19 Cytek's allegations of customer "interest" are themselves cursory. The FACC claims one
20 customer was "in discussions" about a possible purchase, and that the other had apparently expressed
21 "interest" in the Aurora to Cytek. FACC ¶ 19. But, more importantly, the FACC does not allege
22 any connection between the customer's purported loss of interest and BD's alleged conduct. Cytek

24 ⁶ The UCL cases Cytek invokes (Opp. at 9) did not involve tying; and the court that sustained a UCL
25 unfairness claim found an actual "reduction in competition," which is not alleged here. *Imperial*
26 *Irrigation Dist. v. Cal. Indep. Sys. Operator Corp.*, No. 15-CV-1576-AJB-RBB, 2016 WL 4087302,
27 at *13 (S.D. Cal. Aug. 1, 2016). *Compare Creative Mobile Techs., LLC v. Flywheel Software, Inc.*,
28 No. 16-CV-02560-SI, 2016 WL 5815311, at *5 (N.D. Cal. Oct. 5, 2016) (dismissing UCL claim for
failing to allege requisite effects). In *PeopleBrowsr, Inc. v. Twitter, Inc.*, No. C-12-6120 EMC, 2013
WL 843032 (N.D. Cal. Mar. 6, 2013), the court merely considered whether a UCL unfairness claim
raised a federal question under the Sherman Act. *See id.* at *2.

1 does not allege what, if anything, BD actually communicated to the customers; what cytometers (if
 2 any) the customers subsequently purchased; or the reasons why the customers did not purchase from
 3 Cytek. As addressed further next, Cytek does not even allege the customers owned UV-enabled
 4 cytometers that required UV reagents, as would be necessary for any likelihood of Cytek losing a
 5 sale due to the BD tying threats that the FACC speculates occurred. In short, without any causal link
 6 between BD’s alleged conduct and the “likely . . . loss of a sale” (Order at 7)—the “*such that*” this
 7 Court made clear is necessary—Cytek does not allege *any* likelihood of foreclosure, let alone
 8 foreclosure of a not-insubstantial volume of commerce.⁷

9 2. Cytek Fails to Plead Likely Coercion

10 Cytek also fails to plead coercion, an essential tying element, *see Cascade Health Sols. v.*
 11 *Peacehealth*, 515 F.3d 883, 912 (9th Cir. 2008), for a related reason: the FACC does not even allege
 12 that the customers Cytek identifies would be potentially susceptible to any coercion by BD.⁸ This is
 13 because Cytek does not allege that any of the “potential customers” in the FACC *actually owned* a
 14 UV-enabled cytometer requiring UV reagents only available from BD. *See* FACC ¶¶ 18, 19; Opp.
 15 at 2; MTD at 21. Cytek instead vaguely asserts, based on “information and belief,” that “the reagents
 16 that BD threatened to withhold included” UV reagents.⁹ FACC ¶ 22. This allegation deserves no
 17 credit, as the facts in question are *not* “peculiarly within the possession and control” of BD. *Soo*
 18 *Park v. Thompson*, 851 F.3d 910, 928–29 (9th Cir. 2017) (citation and quotation omitted). Cytek
 19 could have asked these customers which reagents and cytometers they use. The Opposition’s claim
 20 that BD’s “dominant position” in the UV reagent market “dissuades customers from cooperating
 21

22
 23 ⁷ Cytek’s allegations regarding the value of potential lost sales are irrelevant, because the FACC does
 24 not allege any likely lost sale due to BD’s supposed conduct. *See* MTD at 22. Because Cytek fails
 25 to plead likely foreclosure, *a fortiori* it also fails to plead, as it must, a likely completed tying
 26 violation. *See* MTD at 15.

27 ⁸ The element of coercion also requires Cytek to plausibly plead that BD has market power in a
 28 relevant market. *See* MTD at 20. As BD explains next, *infra* at 9–13, Cytek fails to do so.

⁹ Cytek’s original counterclaims, by contrast, did allege that BD had threatened to withhold a
 “proprietary” UV reagent from one customer. CC ¶ 20 (ECF No. 72). Cytek struck that allegation
 from the FACC.

with” Cytek (Opp. at 15; *see* FACC ¶¶ 24, 40) has no bearing when it comes to customers that the FACC makes clear were willing to speak to Cytek about their interactions with BD.

Because Cytek does not plausibly allege that any of the customers required UV reagents, there is no basis for the Court to infer that any of these “potential customers” were even capable of being coerced by BD’s supposed threats. The FACC fails to allege any likelihood of coercion given this fatal disconnect.

3. Cytek’s UV Reagent Market Fails as a Matter of Law

(a) Cytek Fails to Allege a Relevant Product Market

BD demonstrated (MTD at 16–18) that Cytek’s purported “global market for UV reagents” (Opp. at 10) is invalid. The Opposition only underscores that Cytek’s gerrymandered market fails.

First, Cytek has not plausibly alleged a market encompassing “the product at issue as well as all economic substitutes for the product.” Opp. at 10–11 (citing *Newcal Indus., Inc. v. Ikon Office Sol.*, 513 F.3d 1038, 1045 (9th Cir. 2008)). Cytek offers no allegations that would establish that, *before* a customer assembles a panel, non-UV reagents are not an economic substitute for UV reagents. The FACC does not offer any allegations that there is a lack of reasonable interchangeability or cross-elasticity of demand between the reagents included in Cytek’s purported product market (the UV-compatible reagents) and the reagents excluded from that market (non-UV reagents).¹⁰ *See Tanaka v. Univ. of S. Cal*, 252 F.3d 1059, 1063 (9th Cir. 2001). Dismissal is warranted not based on the principle of facial implausibility (Opp. at 10–11), but rather because of a principle Cytek ignores: the FACC does not offer any factual allegations to show a lack of cross-elasticity between the products included in and excluded from Cytek’s proposed market. *See, e.g.*,

¹⁰ Under Cytek’s deficient reasoning, every color of reagent would be its own product market. *See* FACC ¶ 21 (alleging that “each reagent”—red, green-yellow, blue, violet, and ultraviolet—“provides information regarding different characteristics of a cell”). Cytek does not allege any facts that could explain why, for instance, a red reagent would be economically interchangeable with a blue reagent, but a UV reagent stands on its own, before a panel is assembled. Rather, Cytek’s own allegations make clear that Cytek is attempting to gerrymander a “UV only” reagent market because its abandoned allegations about the overall reagent market failed to plausibly plead BD’s market power. *See* Order at 6.

1 *Colonial Med. Grp., Inc. v. Catholic Healthcare W.*, No. C–09–2192 MMC, 2010 WL 2108123, at
2 *3 (N.D. Cal. May 25, 2010).

3 *Second*, Cytek provides no reason for defining the market after a customer has decided to
4 develop a panel requiring a UV reagent, rather than before. As BD demonstrated in its opening brief
5 (MTD at 17), Cytek’s own allegations show that customers know *before* they purchase a UV-
6 functional cytometer that they will need to purchase UV reagents. See FACC ¶¶ 21, 23; *see also*
7 *Apple Inc. v. Psystar Corp.*, 586 F. Supp. 2d 1190, 1201 (N.D. Cal. 2008) (finding that correct
8 perspective from which to define market is at the time customer makes a choice that knowingly limits
9 its future options). In response, the Opposition looks to shift the analysis to the wrong perspective:
10 to the customer’s choices *after* it has decided to purchase a UV-enabled cytometer. Once a customer
11 has designed a panel that includes UV reagents available from BD, so Cytek claims, the customer is
12 locked into buying BD’s UV reagents. Cytek, however, does not allege that customers are somehow
13 forced into such a relationship with BD at the time they assemble panels and purchase cytometers.
14 Cytek admits that there are alternatives to cytometers requiring UV technology (FACC ¶ 48), as well
15 as other suppliers of UV cytometers (Opp. at 16), and fails to allege that UV reagents are essential
16 *at the time a customer develops a panel*. This is why Cytek’s artificial “UV reagent” market is the
17 “functional equivalent” of an invalid “contractually-created aftermarket.” *Psystar*, 586 F. Supp. 2d
18 at 1200–03 (cited in MTD at 17). UV reagents only are essential, under Cytek’s allegations, *because*
19 of a choice the customer previously made that Cytek does not allege was itself coerced.

20 Cytek’s argument (Opp. at 16–17) that this is not a case where customers agreed to an alleged
21 aftermarket restraint is thus a red herring that misses the point. Cytek does not dispute that markets
22 defined after a purchase decision is made typically are invalid. *See, e.g., Psystar*, 586 F. Supp. 2d at
23 1198. To succeed on its “lock-in” theory, Cytek must allege facts showing that the need to compete
24 for *un*locked-in customers does not constrain BD, either because BD changed its “policy” and market
25 imperfections conceal it, or because BD has engaged in fraud. *See Eastman Kodak Co. v. Image*
26 *Tech. Servs., Inc.*, 504 U.S. 451, 473–78 (1992); *Newcal*, 513 F.3d at 1048–49. Cytek alleges neither.

1 For one thing, Cytek does nothing more than recite the legal conclusion that BD instituted a
 2 “new . . . policy to withhold reagents to Aurora customers” only after customers were “locked in” to
 3 cytometers requiring BD reagents. FACC ¶¶ 24, 40. Cytek’s averments are wholly conclusory and
 4 not supported by any well-pled facts.¹¹ For another, the courts in *Newcal* and *Kodak* required fraud
 5 and market imperfections, respectively, because restricting a market to post-purchase choices is
 6 inappropriate absent a reason why seeking to exploit locked-in purchasers is rational. *See Kodak*,
 7 504 U.S. at 474–75; *Newcal*, 513 F.3d at 1048–49 (explaining “economic presumption” against lock-
 8 in theories). Cytek’s lock-in theory flunks this essential reality test.

9 Cytek has not pleaded that BD would be able to keep attracting cytometer customers while
 10 allegedly requiring those who already purchased BD UV machines to refrain from buying from Cytek
 11 as a supposed condition for continued access to BD’s UV reagents. Nor does Cytek allege any
 12 “market imperfections” that render competition for new cytometer customers insufficient to protect
 13 against restrictions on access to UV reagents in the aftermarket. Indeed, Cytek avers that only
 14 sophisticated customers purchase cytometers and reagents (*see* FACC ¶¶ 2, 21, 24) and that BD’s
 15 purported tying “policy” is a matter of common knowledge, such that customers could look to avoid
 16 BD’s UV-functional cytometers and buy elsewhere (*see* FACC ¶¶ 40, 48; Opp. at 16). These
 17 allegations stand in stark contrast to *Kodak* and *Newcal*, where life-cycle pricing difficulties and
 18 allegations of fraud justified ignoring competition in the foremarket and restricting the market to
 19 those customers who had already made purchases. *See Kodak*, 504 U.S. at 477 (holding evidence
 20 existed that “information costs and switching costs foil the simple assumption that the equipment
 21 and service markets act as pure complements to one another”); *Newcal*, 513 F.3d at 1050 (holding
 22 that allegations of fraud and deceit overcome “economic presumption” that “[c]ompetition in the
 23 initial market” will “suffice to discipline” aftermarket).

24
 25
 26
 27 ¹¹ Nor can Cytek cure this deficiency with its vague allegations that BD made “threats” to a handful
 28 of customers (FACC ¶¶ 24, 40), particularly where Cytek fails to allege elsewhere that the customers
 were actually subjected to these purported threats. *See supra* at 4-5, 8-9.

1 For all of these reasons, Cytek has failed to define a relevant product market, which warrants
2 dismissal of the FACC.

3 **(b) Cytek Fails to Allege Market Power**

4 Cytek's tying claim also fails for the separate reason that Cytek does not sufficiently allege
5 that BD has the requisite market power in a sufficiently defined market for UV reagents to coerce a
6 tie.¹² First, this Court should not credit Cytek's allegation that BD possesses 100% market share in
7 the UV reagent market. FACC ¶ 22. Cytek points to no authority that would permit it to plead this
8 essential element solely on "information and belief." See MTD at 18.

9 Second, the other factors that Cytek invokes—including charging higher prices and holding
10 patents (FACC ¶ 22)—do not plausibly allege market power. "[H]igh profits may be indicative of a
11 variety of factors other than a monopoly power, such as an extraordinary market, operating
12 efficiency, or high-quality management." *High Tech. Careers v. San Jose Mercury News*, No. CIV.
13 90-20579 SW, 1995 WL 115480, at *3 (N.D. Cal. Mar. 14, 1995), *aff'd*, 94 F.3d 651 (9th Cir. 1996).
14 Further, as Cytek itself admits (Opp. at 11), BD's patents do not create a presumption of market
15 power. See *Ill. Tool Works Inc. v. Indep. Ink Inc.*, 547 U.S. 28, 45 (2006). Nor do Cytek's patent
16 allegations sufficiently allege entry barriers here. Cytek does not plausibly allege that BD's patents
17 for UV reagents preclude potential competitors from developing similar products. Cytek only avers
18 that the BD patents "cover[] [BD's] UV reagents"; Cytek fails to allege that the patents preclude
19 other paths for commercializing UV reagents. FACC ¶ 22. Cytek's allegations regarding BD's
20 supposed "litigiousness" (Opp. at 11) add nothing, both for this reason and because the cited lawsuit
21 centered on "'copy-cat' non-UV products." *Id.*

22 Third, the Opposition wrongly contends that Cytek need not plead market power to state a
23 claim under Section 16727 of the Cartwright Act. Opp. at 17-18. Here, Cytek inexplicably cites the
24 same decision by Judge Ware (Opp. at 18) that was later vacated in a ruling that clarified, "*Morrison*
25 does not stand for the proposition that a plaintiff need not establish market power." *Advanced*

26
27 ¹² The Opposition confirms that Cytek is not asserting BD's market power in any other market,
28 including the market for cytometer reagents generally. See Opp. at 11-12.

1 *Microtherm, Inc. v. Norman Wright Mech. Equip. Corp.*, No. C 04–02266 JW, 2010 WL 11575007,
 2 at *2 (N.D. Cal. Nov. 22, 2010), *aff’d*, 525 F. App’x 612 (9th Cir. 2013) (unpublished). Cytek’s
 3 argument that the “law of the case” doctrine disposes of this point (Opp. at 17) fares no better.
 4 Application of the doctrine “is discretionary,” and for it to apply, “the issue in question must have
 5 been ‘decided explicitly or by necessary implication in the previous disposition.’” *United States v.*
 6 *Lummi Indian Tribe*, 235 F.3d 443, 452 (9th Cir. 2000) (citation and alteration omitted). In
 7 dismissing Cytek’s original UCL counterclaim, the Court did not specifically analyze whether
 8 Section 16727 requires market power, because Cytek had failed to state a claim for several other
 9 reasons. *See* Order at 6–7. BD again respectfully submits that Section 16727 does in fact require a
 10 plaintiff to plead market power. *See* MTD at 20. Cases stating that Section 16727 does not require
 11 market power themselves invoke obsolete decisions presuming market power from unique assets, a
 12 doctrine the Supreme Court expressly rejected and California courts would no longer follow. *See id.*

13 * * *

14 Despite this Court’s instructions, Cytek has again failed to plead the essential facts that would
 15 permit this Court to infer the existence of any tying policy that could harm competition. Cytek’s
 16 tying-based UCL claim should be dismissed, this time with prejudice.

17 **C. Cytek Fails to Allege Any Entitlement to an Injunction Based on the**
 18 **Assignment Provisions**

19 Cytek’s argument to resuscitate its rejected, entirely unchanged UCL claim based on the
 20 assignment provisions in BD’s employment agreements pivots to a new focus. In both its original
 21 counterclaims and the FACC, Cytek conceded that the Court had dismissed BD’s claim against it
 22 based on the assignment provisions, but nonetheless alleged that the existence of the assignment
 23 provisions and BD’s breach of contract claim against the Individual Defendants have created
 24 “uncertainty” for its business. *See* FACC ¶¶ 53, 60, 62; CC ¶¶ 61, 63; Opp. at 20. Those allegations
 25 did not support a UCL injunction before, and do not change the outcome now, for two key reasons.
 26 *First*, Cytek lacks standing to assert a UCL claim because it does not allege any non-speculative,
 27 imminent harm to itself. Cytek instead relies wholly on the prospect of future harm to third parties
 28

(the Individual Defendants) and to California employers generally. *See Kwikset Corp. v. Superior Court*, 51 Cal. 4th 310, 323 (2011) (UCL confers no standing to protect third parties). *Second*, the Court might decline to enter relief in BD’s favor against the Individual Defendants. Cytek therefore fails to identify any threat of *irreparable* harm that would warrant injunctive relief.

III. CYTEK SHOULD NOT BE GRANTED FURTHER LEAVE TO AMEND

Lastly, this Court should reject Cytek’s argument that it should get a third bite at the apple based on a cryptic reference to “new acts of unfair competition” that it has supposedly discovered since filing the FACC. Opp. at 21. Such vague allusions do not provide grounds for leave to amend after a party has already had a chance to amend in response to a decision on a dispositive motion. *See, e.g., Gonzalez v. Planned Parenthood of L.A.*, 759 F.3d 1112, 1116 (9th Cir. 2014) (emphasizing “the district court’s discretion in denying amendment is particularly broad when it has previously given leave to amend” (citation omitted)); *see also Mililani Grp., Inc. v. O’Reilly Automotive, Inc.*, 621 F. App’x 436, 437 (9th Cir. 2015) (same). Cytek does not explain how it would cure the deficiencies that remain in the FACC, and instead offers only more innuendo. This Court need not entertain Cytek’s serial attempts to launch a fishing expedition. Because Cytek “fail[s] to state what additional facts [it] would plead if given leave to amend . . . amendment would be futile,” and the FACC should be dismissed with prejudice. *Kendall v. Visa U.S.A., Inc.*, 518 F.3d 1042, 1052 (9th Cir. 2008).

IV. CONCLUSION

For the foregoing reasons, as well as those set forth in BD’s opening brief, the Court should dismiss Count I of Cytek’s First Amended Counterclaims with prejudice.

1 Date: May 31, 2019
