

Kenneth Mike Evans

September 2, 1960 - December 20, 2020

Mike was also a creative and imaginative man. He understood almost any device or machine's inner workings and was always looking to broaden his knowledge on topics that he did not already grasp. Working at ST Genetics, he developed many patents over his career, worked with the International Society for Advancement of Cytometry, and helped cultivate a rich, fulfilling workplace. Those who worked with him could always tell you about his ability to create an inspiring space and facilitate others' success.
