

# SOP-P021

## Preparation of Bleach-SDS

**Objective:** To prepare a mixture of 1% sodium dodecyl sulfate (SDS) in bleach to use as a microbicide for cell culture.

**Procedure:**

1. Put 200 ml household bleach into a clean 500 ml wash bottle.
2. Add 200 ml 1% SDS (refer to SOP#-P026 for Preparation of 1% Sodium Dodecyl Sulfate (SDS)).
3. Store at room temperature.
